

Check, Please!

Patient Name

Patient Date of Birth

It's simple. Check every time *because* we care about the safety of our patients and employees. Patients won't mind as long as they know why. Think of Mercy like "Cheers" – a friendly place where everyone knows your name.

Completing these two simple patient identifiers keeps patients safe from misidentification and keeps you safe from making a mistake. Technology is great, but it is not a substitute for our employees who live out *The Mercy Touch*® every day.

100% compliance; no medical errors – that's the goal. It's a minor inconvenience with a major impact. We are all human and we all make mistakes – but we can avoid making an identification error by asking two simple questions each time we treat a patient.

Remember to **check, please** to be sure our patient care is accurate, safe and of the highest quality.

Your patients will understand this is just another example of why we say *There's more to the Mercy Touch.*
