- For cleaning and priming refer to the patient instructions that accompanies your inhaler.
- Following these step by step instructions will help you to inhale medicine effectively.

Step1: Remove the cap from the inhaler.

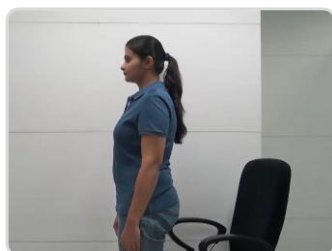

Step2: Remove the cap from the spacer.

Step3: Shake the inhaler well for 5 seconds.

Step4: Insert the inhaler into the open end of the chamber. Ensure that the inhaler fits properly.

Step5: Sit straight or stand up.

Step6: Tilt your head back slightly.

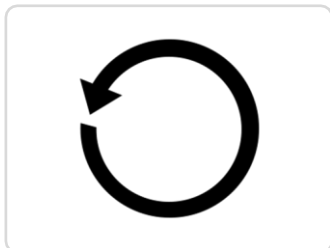

Step7: Exhale away from the inhaler.

Step8: Place the mouthpiece in your mouth. Press the inhaler once and take a deep and slow breath.

Step9: Hold your breath for 10 seconds. Exhale slowly through your mouth or nose.

Step10: Repeat 2 to 8 steps after 30 seconds, if another dose is required. If you are using a corticosteroid medication, rinse your mouth after all doses are complete.

Tip: Remember to rinse your mouth thoroughly after taking your dose and spit out the water.
